NEW CAMRY

POWER THAT TRANSCENDS
LUXURY THAT INDULGES

PRESENTING THE *Awesome* NEW CAMRY HYBRID

Experience a legacy
founded on luxury.
A legacy that has earned
respect since 1980,
inspired awe and
rewritten history,
year after year for
the last 32 years.
Experience the life of
boundless magnificence
with Self-charging
Hybrid Electric Technology
that makes it the
King of Sedans.
Discover the
10th Generation Camry.

ZERO TO ZOOM IN SECONDS

Tame the world with the exhilarating power of 218 PS generated by electric motor & engine in tandem. Live the thrill of awesome with 221 Nm torque.

HYBRID SYNERGY DRIVE 2.5L Dynamic Force Engine

POWER THAT TAKES YOU FARTHER AND FASTER

RESPONSIVE POWER

The new Camry self-charging hybrid electric technology works in total synergy to deliver a seamless & powerful acceleration in sports mode & a more responsive torque exactly when you need it.

QUIETER DRIVE

Compared to conventional cars, the new Camry can run on the electric motor alone, giving you a near-silent driving experience and an absolutely tranquil cabin ambience.

LOWER EMISSIONS

The new Camry produces up to 2 tonnes lesser CO_2 per year than an equivalent car in the same class.

UNMATCHED FUEL EFFICIENCY

Intelligently designed with 2 power sources, Toyota Camry promises fuel efficiency like no other.

NO CHARGING INFRA REQUIRED

When the battery does run low, excess power from the engine charges it back up again, keeping you going. Plus, the action of braking recycles energy to charge the battery, wasting nothing.

TNGA **Toyota New Global Architecture**

In constant search for improvements, TNGA aims to achieve the fundamental vehicle platform to enhance overall driving experience, uniting the driver and the vehicle.

EXPERIENCE TOYOTA NEW GLOBAL ARCHITECTURE

Natural beauty styling and a sedan package that provides an interior space that is just right in all seats.

Low hood for forward visibility promotes ease of driving and provides ideal driving experience that combines leading fuel economy and acceleration performance.

Exhilarating driving performance with a fully direct feel provides a high-quality ride through a lightweight, high-rigidity body and independent suspension with class-leading levels of quietness.

TECHNICAL SPECIFICATIONS

ENGINE

Type	2.5L Dynamic Force Engine [A25B-FXS]
No. of Cylinders	In line - 4 cylinder
Displacement	2,487 cm^3
Max. Output	131 kW (178 PS) @ 5,700 rpm
Max. Torque	221 Nm (23 kg-m) @ 3600 rpm to 5200 rpm

HYBRID SYSTEM

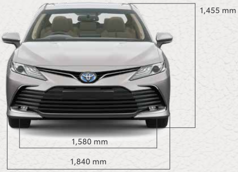
Total Max. Output	160 kW (218 PS)
Drive Mode	EV mode available
Hybrid Battery : Type	Nickel-Metal Hydride
Voltage (Nominal)	245V
Motor Generator : Type	Permanent Magnet Synchronous Motor
Max. Output	88 kW (120 PS)
Max. Torque	202 Nm (21 kg-m)

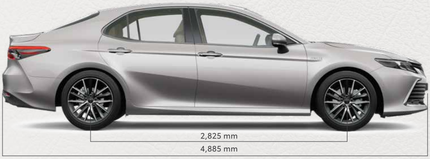
CHASSIS & TRANSMISSION

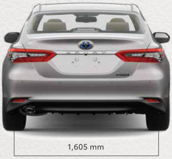
Suspension Front/Rear	MacPherson Strut / Double Wishbone
Brake Front & Rear	Disc
Tyres & Wheels	235/45R18 Alloys
Transmission	e-CVT (Electronic - Continuously Variable Transmission) - P710
Driving Modes	Sport, Eco, Normal

DIMENSIONS & WEIGHT

Overall L x W x H	4885 mm x 1840 mm x 1455 mm
Wheelbase	2825 mm
Track Front/Rear	1580 mm/1605 mm
Min. Turning Radius	5800 mm
Fuel Tank Capacity	50 litres
Seating Capacity	5-seater
Kerb Weight	1,665 kg
Gross Weight	2,100 kg







FEATURES

EXTERIOR FEATURES

- Newly designed front bumper, upper & lower grille with chrome inserts
- Newly developed 18-inch alloy wheels with bright machined finish on dark grey metallic base
