

ELETRE

THE WORLD'S FIRST ELECTRIC HYPER-SUV FROM LOTUS

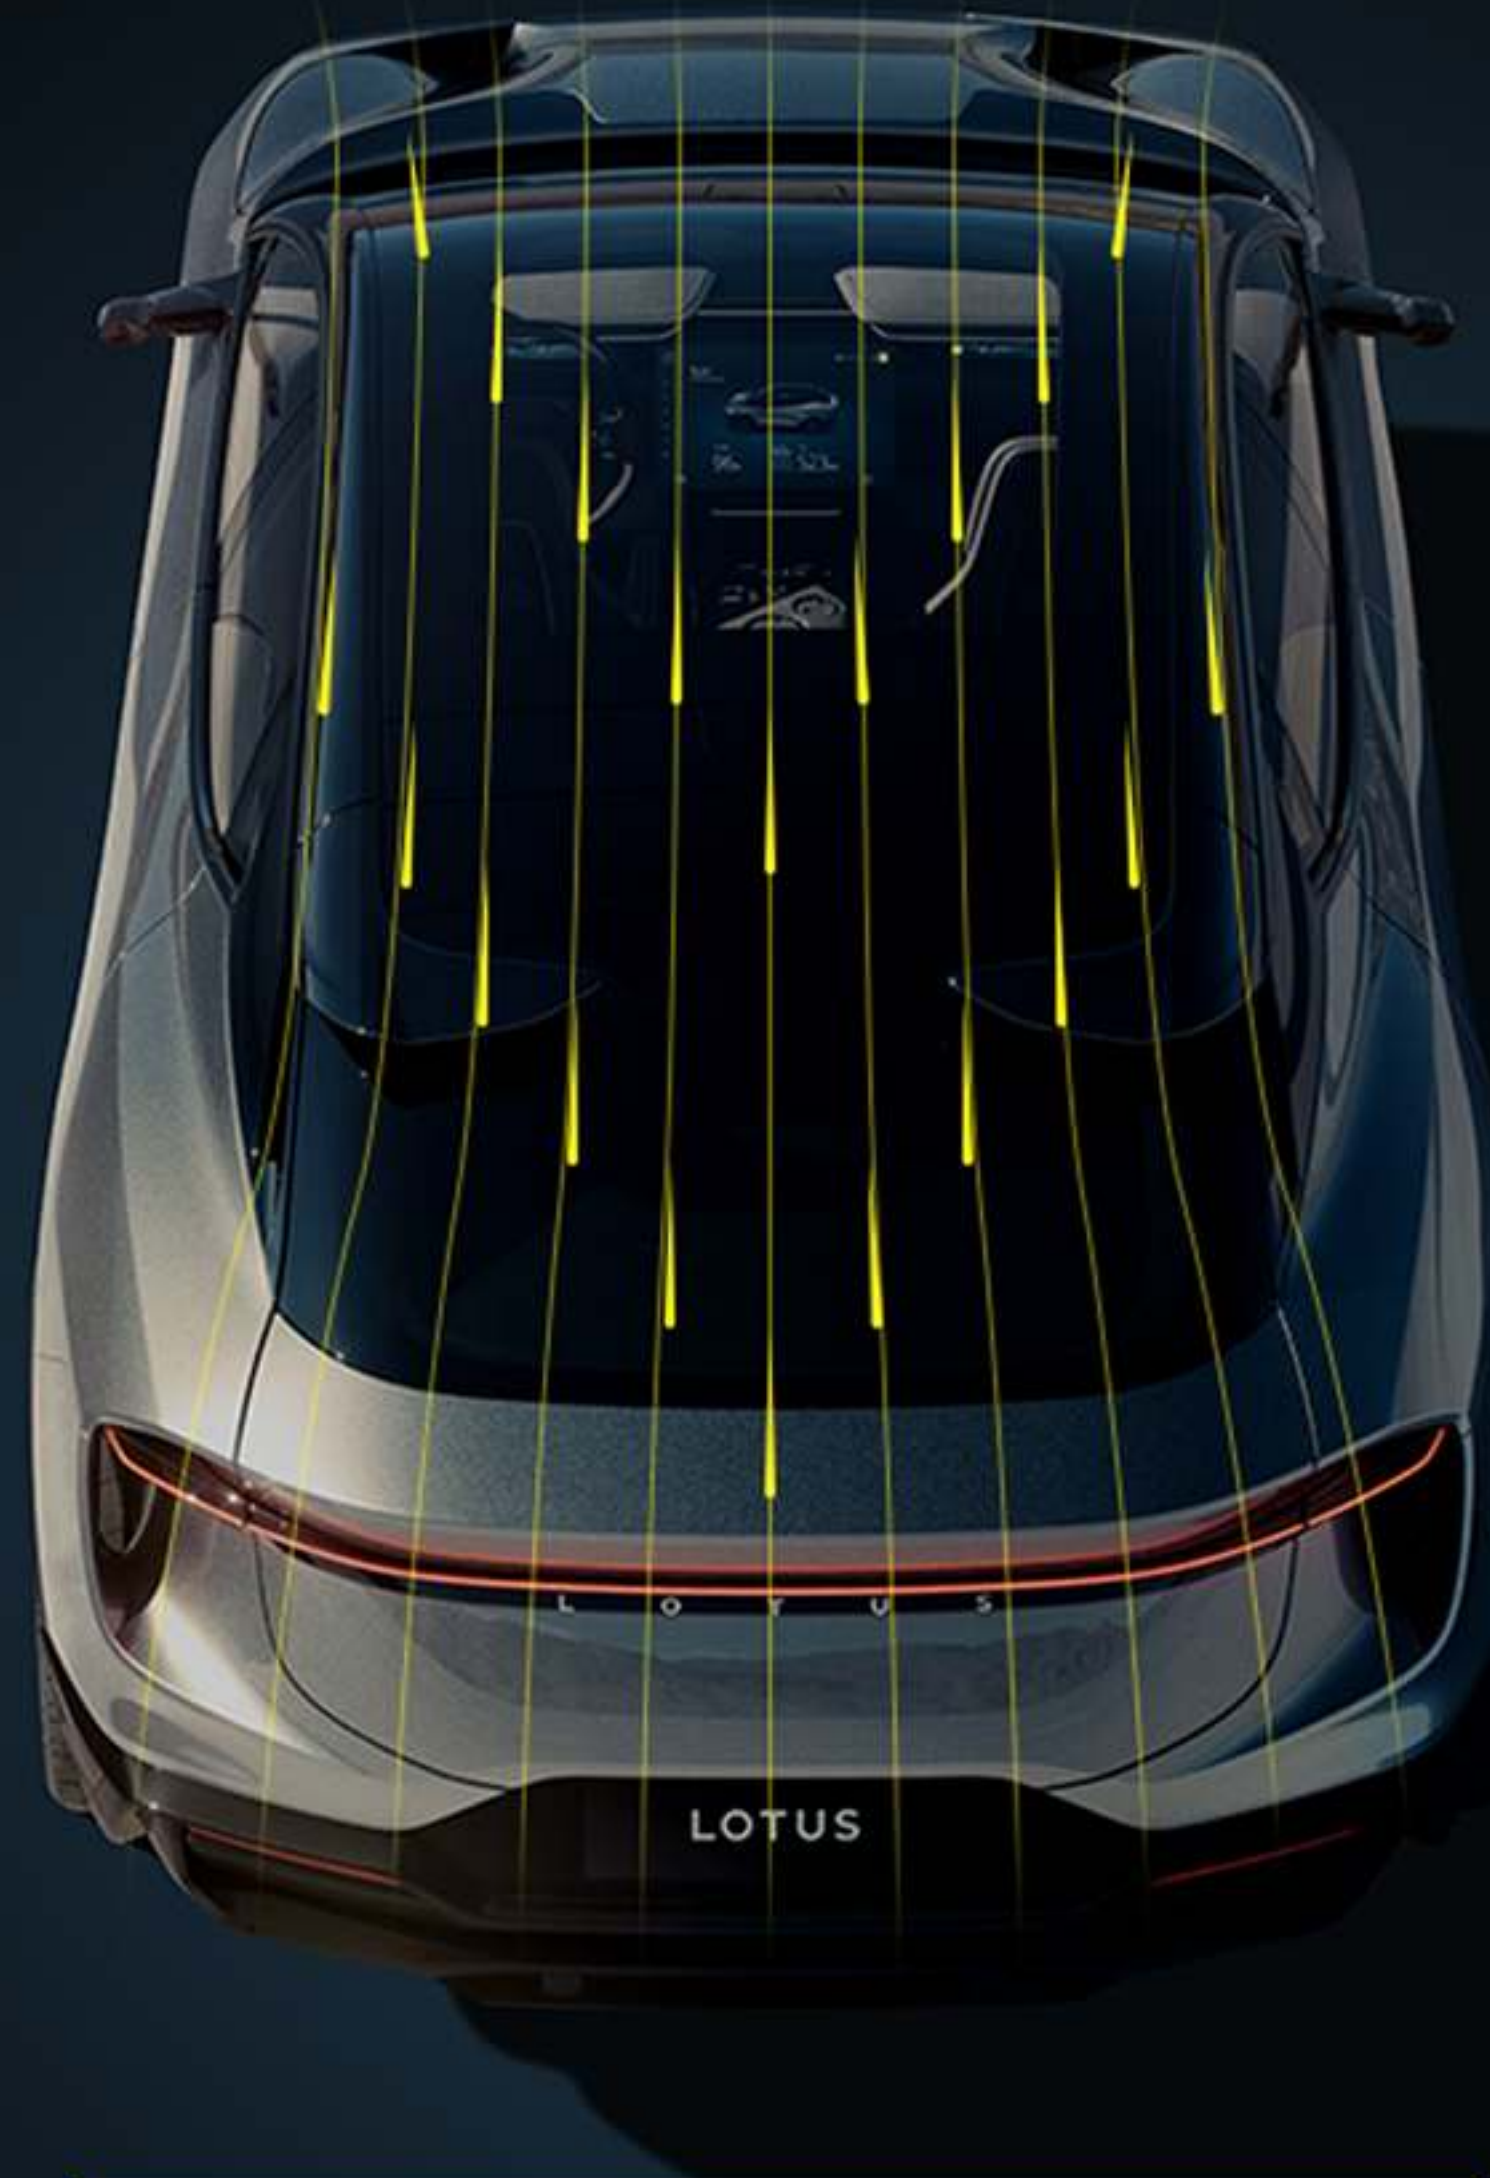

AVAILABLE FOR PRE-ORDER

LOTUS CARS THAILAND BY WEARNES AUTOMOTIVE

CARVED BY AIR

The all-new and all-electric Lotus Eletre is a striking and progressive Hyper SUV. It takes the core principles and Lotus DNA from more than 70 years of sports car design and engineering, evolving them into a desirable all-new lifestyle car. Eletre has an elegant and exotic look with active aerodynamics and a dramatic porous design. The use of pioneering sustainable materials gives a new level of premium for every journey.

THE AERODYNAMIC PRINCIPLE OF AIR FLOWING THROUGH THE CAR AS WELL AS UNDER, OVER AND AROUND IT.

AERODYNAMICS AT THE CORE

Embracing DNA inherited from the Evija and Emira, vents and ducts channel air through and over the Eletre's bodywork. Responsive shutters and spoilers adjust position to boost range, speed, and handling. 7 sets of wind ducts channels wind allowing the body of the Eletre to cut through air smoothly balancing between energy consumption and extreme control.

WHEN ACTIVE GRILLE SHUTTERS ARE CLOSED AND THE ANGLE OF THE ACTIVE SPOILER IS 32°, THE MAXIMUM DOWNFORCE REACHES 90 KG.

A NEW ICON IS BORN. #LIMITLESS

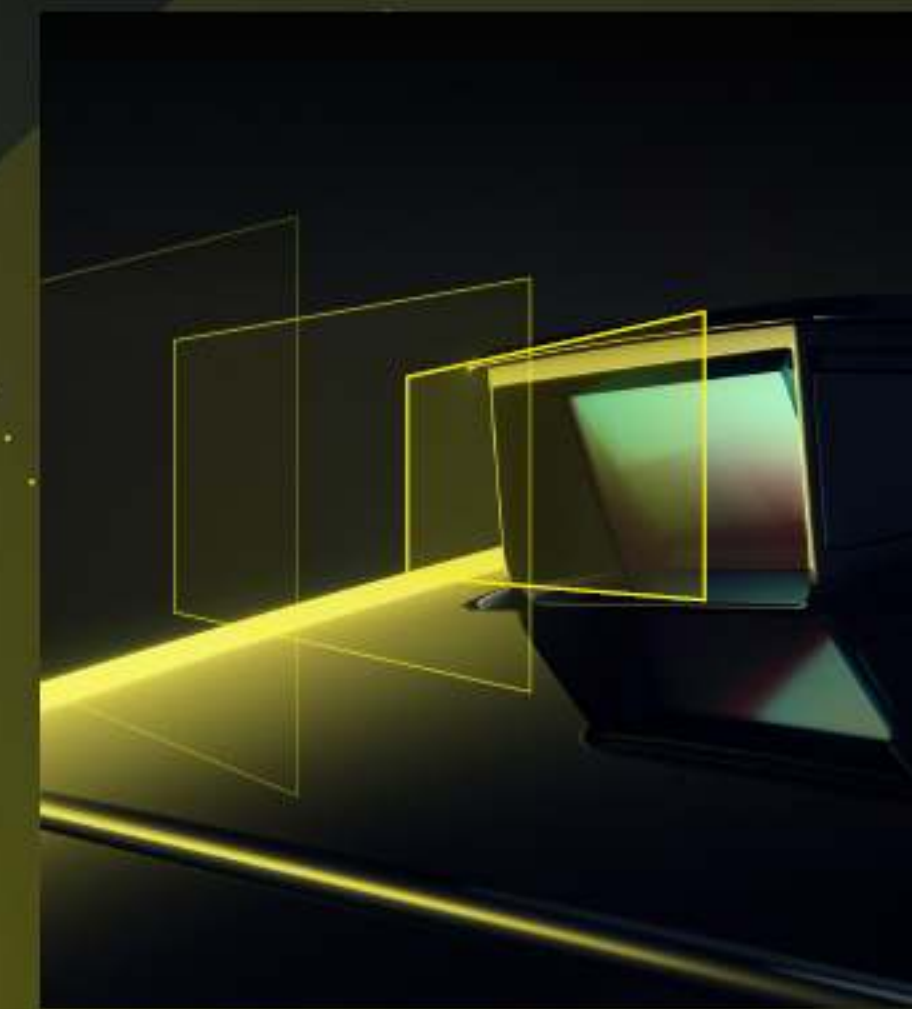

EVERYDAY PERFORMANCE

A true Lotus experience. Optimal structural rigidity and active dynamics, combined with a perfect blend of high power and torque, provide the kind of performance that is expected from a Lotus. With powerful electric motors and a low centre of gravity, this new icon makes ordinary driving, extra.

AUTOMOTIVE
INNOVATION

34 SENSORS

The world's first deployable LiDAR system and advanced autonomous driving capabilities make this the most technically advanced Lotus, ever. Etre is the first global SUV with 800V architecture, providing exceptional range and charging options, meaning less time plugged in and more time driving.

The deployable sensors are hidden when not required, ensuring the car's striking design shines through and only emerging from the top of the windscreen, the top of the rear glass, and from the front wheel arches as required. Add in a dynamic walk-up sequence, advanced interface and heads-up display, Etre makes the everyday special.

CUTTING-EDGE INTELLIGENCE

12.6-inch ultra-thin master and co-driver screen and a 15.1-inch OLED ultra-thin floating touch screen.

The central hollow design and the air outlet of the arrow feather air conditioning create a sense of lightness like wings.

Visually interpret the lightweight concept inherited by vision. The interior details are covered with liquid metal materials creating a high-end jewelry-like texture and long-lasting.
